WHY OPTIMIZE?

- In shipping, every decision you make has an opportunity cost.
 - Thus, it is imperative to make the right decisions every time.
- In today's market, the traditional reliance on employee experience and brute force solutions no longer hold weight.
 - With more difficult market conditions, there is little room for error.
- Companies must achieve more in less time in order to remain competitive on the market.
 - Decisions must be made accurately, at the pace of business.

MEET THE OPTIMIZER

VESON'S PROPRIETARY ARTIFICIAL INTELLIGENCE ALGORITHM

- Visually combines your Vessel Schedule with upcoming cargo and vessel opportunities
- Dynamically updates basis market positions and operational voyage changes
- Quickly runs all permutations of vessel/cargo matches to output multiple Optimized suggested schedules
- Extensible by design to apply to various optimization goals
- Enables easy scheduling of Optimized suggestions in a collaborative chartering workspace
